

W02-P1: Show <Hero_xx > with screen width = 768px

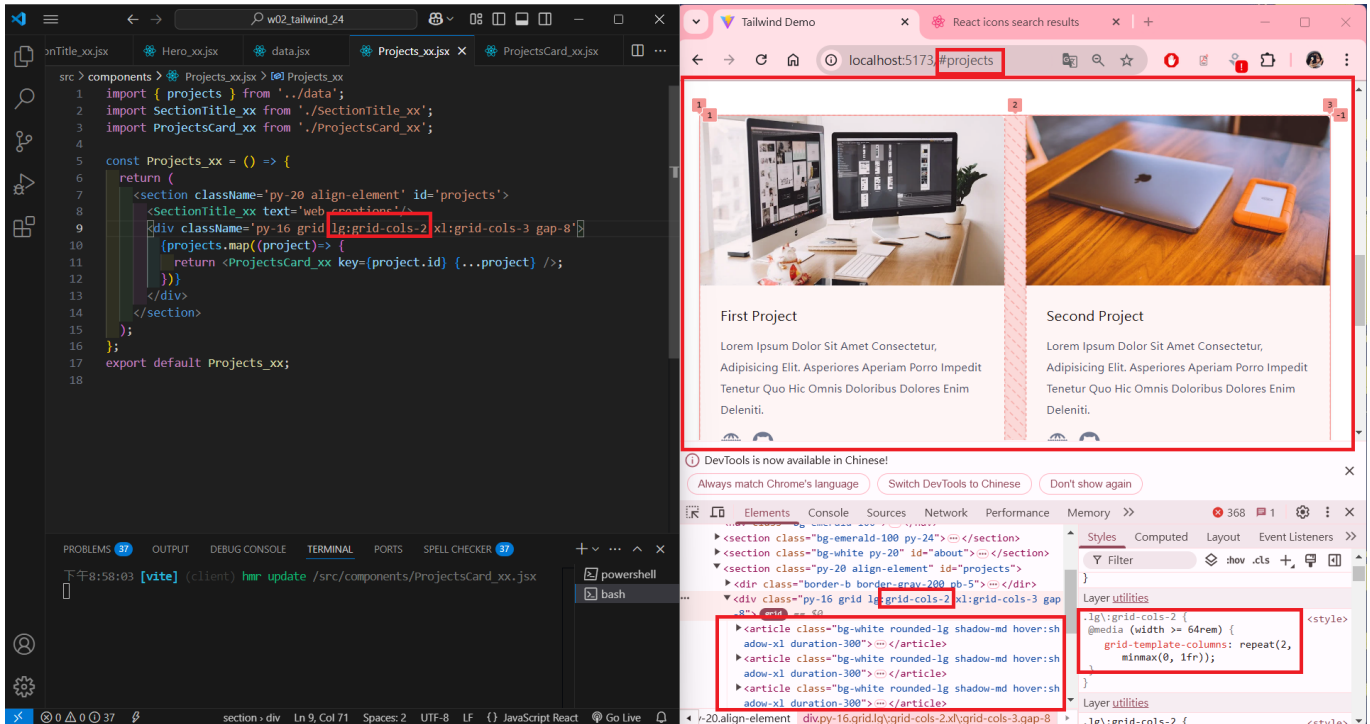

The screenshot displays a development environment with two main windows. The left window is the Visual Studio Code editor, showing the source code for two components: `SectionTitle_xx` and `About_xx`. The `SectionTitle_xx` component is a simple text display component. The `About_xx` component imports `aboutSvg` and `SectionTitle_xx`, and renders a page with a white background, a grid layout, an image of a person at a computer, and the `SectionTitle_xx` component with the text 'code and coffee'. The right window is a web browser showing the rendered output of the `About_xx` component. The browser's address bar shows `localhost:5173/#about`. The rendered page features a large heading 'Code And Coffee' which is highlighted with a red rectangular box. Below the heading is a paragraph of Lorem Ipsum text. The browser's developer tools are open, showing the component structure and the rendered HTML.

```
fae00af shiuanling  
<SectionTitle_xx />
```
